The Making A Difference course is being offered at the Howard University School of Divinity.

The complexities of ministry today require a strong foundation, the ability to generate and foster the participation and involvement of others, and the flexibility to deal with the multiple concerns in a daily climate of shifting and often competing agenda items. These challenges require new possibilities for personal and professional effectiveness and leadership. This course provides you with tools to create these possibilities.

Deepen your prayer life

This course allows those who minister to reclaim the power that originally called them into ministry and gives them the tools to return again and again to the source of their calling, tools they use to awaken within themselves and others new ways of being, leading and serving.

Discover a new way of listening

Its purpose is to challenge you to rethink what is possible for yourself and for your ministry.

Learn how to revitalize yourself and others to act on a prophetic vision

Leave equipped with tools to revitalize your commitment and your gifts to bring about a future that matches your vision.

Experience breakthrough results in your ministry and your life!
